CARIBBEAN NETHERLANDS SCIENCE INSTITUTE

CNSI the Caribbean Netherlands Science Institute at St Eustatius is a facility that fosters scientific curiosity and supports scientific research, capacity building, knowledge development and dissemination, addressing issues and questions relevant to the sustainability of tropical small island economies.

CNSI's Science Café is to enjoy an informal get-together of CNSI guests and residents and visitors of St Eustatius to inspire and engage each other in discussions and networking opportunities relevant to knowledge building for the sustainable development of St Eustatius, the Caribbean Netherlands and the Caribbean region.

Science Café
